

5 Reasons

Oil & Gas Companies Choose RDC Solutions

“It was important to Chevron to work with a company that really knew our industry and understood our operating issues.”

*Training Specialist
Chevron USA*

“The content of the RDC training material continues the high standard of the API / Pilot self-learning programs I used when I started in the petroleum business 35 years ago. Their technical support staff has been exceptional in getting us started and providing the support we need.”

*Manager of Training
Big West Oil Refinery*

Even more reasons:

- Certified instructional design methodology
- Easily customizable courses
- Operations and Maintenance craft-specific curriculum capabilities
- Seamless integration of Operating Procedures and Safe Work Practices
- Compliance reporting tools
- Evergreen updating of EH&S, OSHA, & BSEE regulatory changes
- Personalized learning
- Pre/new-hire and refresher assessments
- Ability to link to 3rd-party content
- Classroom/in-field training event management
- Content authoring environment

1. Industry Experience

For more than 50 years, Resource Development Company (RDC) specialized in learning and compliance solutions for the oil and gas, refining, chemical, petrochemical, and pharmaceutical industries. As the developer of the industry's first comprehensive API-validated learning curriculum that remains the most widely-used technical content library today, RDC is a trusted source for operator training and learning technologies. RDC is a wholly owned subsidiary of PetroSkills.

2. Knowledge Gap Identification and Remediation

RDC's learning programs have the unique ability to pre-assess a worker's current job knowledge and then compare it to the established knowledge required for his/her job. Topics range from core technology to operating procedures and safe work practices. Differential Learning dynamically selects and delivers the appropriate learning content to satisfy each identified deficiency and assigns a precise path to reach 100% proficiency for each individual.

3. PSM and SEMS Compliance Management

RDC created the industry's first compliance reporting tool over 20 years ago to help clients meet the regulatory demands of Process Safety Management (PSM). RDC's Active Learner™ environment is designed to produce precisely what is required to satisfy audit demands, with less administrative effort. With the addition of Safety and Environmental Management Systems (SEMS) requirements in 2011, RDC is leveraging proven PSM-compliance functionality to help offshore companies quickly meet these new demands.

4. Complete Spectrum of Learning Programs

Unlimited access to RDC's ePILOT™ library of over 250 web-based core technical and mandated safety courses means companies don't have to start from scratch to develop well-balanced learning curriculums. Additionally, ePILOT process-specific operations means ePILOT offers the broadest range of industry content available from any single vendor.

5. No Software or IT Support Required

Companies and employees have 24/7 unlimited access to the learning and compliance management environment. Only internet access and Microsoft Internet Explorer are required.

Industry Focus - Global Reach

By helping companies develop a holistic approach to managing their workforce knowledge, meeting compliance mandates, and withstanding the challenges facing the industry, RDC has become a leader in knowledge transfer solutions for the process industries.

A key differentiator is RDC's industry-specific focus with dedicated business units assigned to the Oil & Gas, Chemical, and Pharmaceutical industries. By working with the leaders in process manufacturing, including the top global petroleum refiners and the licensors of the process units, the RDC team has gleaned industry expertise and best practice experience.

RDC began over 50 years ago as the exclusive developer of Programs In Learning Operating Techniques (PILOT®) for the American Petroleum Institute. Today, ePILOT™ is the most extensive library of web-based learning modules for addressing mandated, core competency, and unit operations knowledge requirements. Active Learner™ is a best practice performance support system specifically designed to manage learning and compliance in highly regulated process manufacturing facilities. PetroSkills | RDC Solutions offers process and job-specific, differential learning environments focused on developing and maintaining 100% knowledge proficiency. RDC's learning solutions are used globally by over 1.4 million learners in over 500 facilities, spanning six continents.
